

suppinger single-cell cytometry abundances

Absolute cell counts per type over observed time points; thick black line shows total cells per batch and time point.

Cell type

-  Naïve pluripotency
  Pre-somitic mesoderm
  Gut
  Neuromesodermal progenitors
  Caudal epiblast/primitive streak
 Exiting naïve pluripotency
  Somite differentiation front
  Paraxial mesoderm
  Cd63+ ectoderm-like artefact
  Anterior primitive streak/Def. endoderm
 Zscan4+ Artefact
  Ectopic pluripotency
  Hemogenic endothelium
  Epiblast/primitive streak
  Caudal epiblast
 Epiblast
  Caudal mesoderm
  Somite
  Primitive streak

Lines connect observed time points only. Facets correspond to two distinct cell lines.
