

Cell Type	Log2 FC ^a	ETI Low ^b	ETI High ^c	Exp Sample ^d	Incl Prob ^e	Credible ^f	ESS Bulk ^g	ESS Tail ^h
neural	0.246	0.000	1.587	255.3	0.815	No	1,513	2,200
neuromesodermal progenitors	-1.073	-1.876	0.000	114.7	0.788	No	1,454	2,779
somatic	-1.041	-1.587	0.216	126.8	0.602	No	1,618	3,092
unknown	0.638	-0.332	1.587	26.6	0.526	No	3,653	5,674

^a Log2 FC: empirical sample-mean log2 ratio-of-ratios vs pluripotent.

^b ETI Low: lower bound of the 95% equal-tailed credible interval (log2).

^c ETI High: upper bound of the 95% equal-tailed credible interval (log2).

^d Exp Sample: posterior expected cell count.

^e Incl Prob: spike-and-slab posterior inclusion probability.

^f Credible: effect selected at FDR 5%.

^g ESS Bulk: effective sample size for the main posterior mass; higher is better.

^h ESS Tail: effective sample size for posterior tails; higher is better.
