

Cell Type	Log2 FC ^a	ETI Low ^b	ETI High ^c	Exp Sample ^d	Incl Prob ^e	Credible ^f	ESS Bulk ^g	ESS Tail ^h
neural	0.471	0.124	0.424	311.6	0.995	Yes	3,821	3,612
neuromesodermal progenitors	-0.849	-1.208	-0.352	102.1	1.000	Yes	3,926	3,930
pluripotent	0.224	-0.354	0.718	20.2	0.563	No	3,802	3,401
somatic	-0.816	-0.866	-0.138	109.4	0.981	Yes	3,988	3,869
unknown	0.863	0.223	1.273	13.6	0.989	Yes	4,071	3,920

^a Log2 FC: empirical sample-mean log2(neural_bias / TLS) proportion.

^b ETI Low: lower bound of 95% credible interval on log2 scale.

^c ETI High: upper bound of 95% credible interval on log2 scale.

^d Exp Sample: mean organoid cell count per cell type.

^e Incl Prob: 1 - P(H0); posterior mass above sccomp null threshold.

^f Credible: composition effect with FDR < 5% (sccomp_test).

^g ESS Bulk: effective sample size for the main posterior mass; higher is better.

^h ESS Tail: effective sample size for posterior tails; higher is better.
